SIERRA PARK WATER COMPANY

April 2026

Water Treatment Plant

This project will install an oxidation and filtration treatment system to eliminate iron and manganese, which are naturally occurring contaminants in the ground water, from the drinking water in Sierra Park. In addition to constructing a one-story building (approx. 24' x 50') to house the new system, the project also includes installing backwash and waste storage tanks, improvements to Wells 5 and 6 and automation of the existing water storage tank and well operations.

Sierra Park Water Company has awarded a contract to Innovative Construction Solutions in the amount of $2,199,000 with funding from the State of California, State Water Resources Control Board, Division of Drinking Water and the US Environmental Protection Agency with funding from President Biden's Infrastructure Bill. Equipment manufacturing is underway. On-site work is paused until site conditions are suitable again. Completion is expected by the end of 2027.

The site for the new treatment plant is located between Well #6 (the small brown structure) and the green waste disposal area along Jordan Way West.

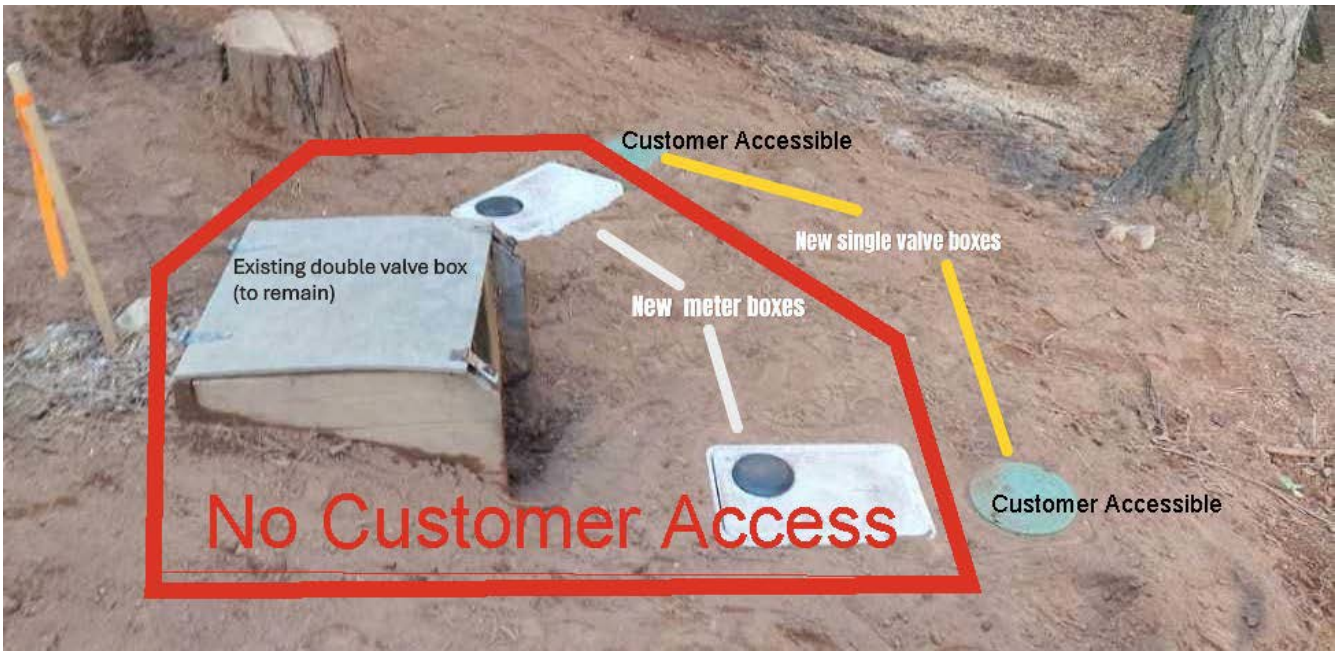
Water Meters Installation

The installation project is now completed. The new water meters will support better management of water use and improve the Company's ability to identify and address leaks in the system. Throughout the park, each residence now has a new meter that can be read remotely. Immediately next to each meter box is a new round single valve box where the supply can be turned on or off to each residence.

Access to new valves: All equipment, including the existing valve boxes, the meters and the new single valve boxes, is Company property.

Customers are advised to install their own shut-off valves with the ability to drain interior plumbing on their own property as needed for winterizing. However, customers will have access indefinitely to the new single valves only.

NOTE: <u>Only personnel authorized by the Water System Operator have access to the new meter boxes and the older valve boxes. NO ACCESS by any other person.</u>



Please be advised: All equipment is the property of Sierra Park Water Company, Inc. Customer access is permissible to the round green single valve boxes only.
