NOTICE OF PUBLIC HEARING FOR A RATE INCREASE

Proposal
Sierra Park Water Company (SPWC) has requested authorization from the California Public Utilities Commission (Commission) through Advice Letter 22 to increase its water revenues by $293,210 or 87.73%. This proposed rate increase will be phased in over two years, $146,605 or 43.86% in Test Year 2026 and by an additional $146,605 or 30.49% in Escalation Year 2027. The last general rate increase became effective November 17, 2019, by Resolution W-5204. The rates were last adjusted in August 2022, by the Consumer Price Index. The average bill for a metered residential customer consuming 3.0 CCF per month could increase from $80.50 to $117.85, or 46.40% in Test Year 2026. SPWC requests a rate increase to fund needed infrastructure improvements to the water system, water system maintenance, business operations, as well as to adjust for inflation. The current monthly bill is a flat rate of $80.50.

The Commission staff will make a thorough investigation of the utility's request. Following the investigation, the Commission may grant the utility's request in whole or in part or may deny it. It may also order the utility to charge rates different from those shown in this notice.

The public meeting is informal and affords customers the opportunity to ask questions and express their views. SPWC will have representatives there to explain the reasons for the proposed increase. Likewise, there will be a Commission Staff representative who will conduct the meeting and explain how the staff will analyze the proposed rates and fee increases.

California law requires the company to show to the Commission's satisfaction that an increase is justified before it may raise its rates. Customers who would like to call the Commission's attention to any problems concerning their water service, or who would like to provide any other information or comments regarding this requested increase should do so at the public meeting and/or should write to the Commission.

Summary
The Monthly Service Charge is applicable to all metered services regardless of water use. Customers also pay the Commission regulatory oversight fee of 0.07% on the water bill.
